AB - SU1622385 Better quality beer is obtd. more efficiently when the water-isomerised hop extract (I) is prepd. using 60% of total amt. of hops used. The extract (I) is mixed with hop dregs and added to the wort, while the remaining 20% of hops are mixed with water in proportion 1:10, respectively, and boiled for 15-30 min. This is followed by cooling additional and added it to young beer before the final fermentation, with the dregs used in the wort boiling stage.

- USE/ADVANTAGE - Used in brewing beeter quality beer at reduced consumption of hops. Bul.3/23.1.91 (3pp Dwg.No.0/0)
